TEXAS DEPARTMENT OF AGRICULTURE
EMERGENCY SEIZURE ORDER

It is hereby ORDERED that any citrus or orange jasmine plant or harvested citrus fruit containing or in close association with citrus leaves, stems, or plant debris located within the following area of the State of Texas is officially seized under the authority of Chapter 71 of the Texas Agriculture Code and must be either destroyed or treated in situ according to the terms and conditions specified below until this order is lifted.

Area Subject to Order

A five mile radius from a point in San Juan, Texas, or FM 2557 halfway between the intersection of E. Moore Drive and FM 2557 and the intersection of El Gato Road and FM 2557.

Treatment Requirements for Citrus or Orange Jasmine Plants

Plants must be held at the location found and not moved to another location and treated with any pesticide product labeled for the control of the Asian Citrus Psyllid and for use on citrus or orange jasmine plants, in accordance with the label, until this Order is lifted.

Treatment Requirements for Harvested Citrus Fruit Containing Or In Close Association With Citrus Leaves, Stems, or Plant Debris

Harvested fruit must be processed to be free of all leaves, stems, or plant debris prior to movement outside of the area subject to this order.

A person to whom this Order is presented and who fails to comply with its requirements is subject to civil or administrative penalties of up to $10,000 per day for any violation of the Order and to the assessment of costs for any treatment or destruction that must be performed by the Department in the absence of such compliance.

ORDERED on this the 18th day of January, 2012 by:

Drew DeBerry
Deputy Commissioner
